

FUJIAN JOINLUCK ENTERPRISE CO. LTD. ADVISES CONSUMERS ABOUT LIGHT BULB DEFECT

Fujian, China, October 28, 2004 Underwriters Laboratories have issued an advisory to the effect that one of our products may pose a potential fire and electric shock hazard.

As one of the leading manufacturers of compact fluorescent bulbs (CFL) in China, producing well over 100 different styles, FUJIAN JOINLUCK ENTERPRISE CO. LTD. assumes full responsibility for an error that might have occurred in the manufacturing of a compact fluorescent 13 watt mini spiral light bulb. This error does not affect any other items in our product line.

From January 2002 to April 2003 we produced and shipped to North America a 13 watt spiral CFL individual bulb which, contrary to published reports, does have UL certification. However, due to an assembly-line error, a non-UL compliant component was inserted in a relatively small number of pieces. Please understand that the item in question is a 13 watt mini spiral only, and then only those manufactured during this time period. These bulbs are stamped with a date code (BHWWYY or BHWWY) with WW signifying the number of the week that the product was produced and YY or Y signifying the year in which the product was produced. The potentially defective bulbs bear date codes ranging from BH0102 (or BH012) to BH203 (or BH2003). No other products supplied by Joinluck are affected.

JOINLUCK stands behind each and every product we manufacture and we assume full responsibility for any defect. We suggest that all bulbs bearing the above codes be returned to Joinluck Recall 10/04, 1453 Cornwall Road, Oakville, Ontario L6J 7T5. If you are a consumer, we will supply you with a 2 for 1 unit replacement.

Please note that it is highly unlikely that any products currently found on retail shelves are affected. Any retailers who may still have some of this product which bears the above mentioned date codes in their inventory are requested to return same to the above address for replacement.

Globe Electric, a leading North American manufacturer and distributor of electrical products, has agreed to assist us with respect to this matter. For further information, please contact Globe's customer service representative at:
